

MARK C. CATTRELL

Assistant Vice President

Expert in Utility Regulation, Financial Advisory, Market Analysis & Resource Planning

Mr. Cattrell advises clients on emerging trends in the energy industry, including technology investment strategies and utility business model innovation. He provides financial analysis, regulatory advisory services, and public policy analysis on a variety of engagements. Mr. Cattrell's projects have included development of strategic approaches to utility modernization, development of regulatory strategies for owners of nuclear energy facilities, asset valuations, state regulatory and federal litigation cases, expert testimony preparation, and client-initiated studies on a wide range of energy-related issues. As a member of Concentric's Future of Energy team, Mr. Cattrell has advised utility clients on strategic approaches to emerging trends including the integration of renewable and distributed generation, energy storage, time-varying rate design, net metering, evolving utility business models, smart grid deployment, and regulatory innovation.

Prior to joining Concentric, Mr. Cattrell worked with various government agencies to implement information security best practices as a consultant with Janus Associates. He also worked on numerous technology projects in Harvard University's School of Engineering and Applied Sciences. He received a B.A. in Computer Science from Colby College and a Master of Public Policy degree from Georgetown University.
