

DANIELLE S. POWERS

Senior Vice President

Expert in Utility Regulation, Financial Advisory, Market Analysis & Resource Planning

Ms. Powers has over 29 years of experience in the wholesale and retail electricity markets, power generation, and energy consulting fields with considerable expertise in wholesale electric market operations and analysis, transmission system planning and operations, generation asset sales and acquisitions, asset valuation, wholesale and retail energy planning and procurement, and power plant operations. She has experience in executing both regulated and unregulated fossil and renewable generation asset sale transactions in the areas of regulatory analysis, policy development, due diligence analyses, energy market assessment, and business unit strategy. With her significant experience in preparing market assessments and forecasts, Ms. Powers has advised several clients on the procurement of competitive electricity in deregulated markets by developing strategic procurement strategies, preparing solicitation packages, evaluating supply and service proposals, and negotiating contracts with retail energy suppliers.

Ms. Powers has been extensively involved in the design, implementation, and operation of the ISO New England Forward Capacity Market as well as the operation of existing wholesale markets in the New England power region. Part of her role in this project was to manage the market design effort, which included designing several processes and procedures pertaining to resource qualification, capacity requirements, and market power mitigation and settlement. Ms. Powers drafted several sections of the Market Rules and presented the draft rules to market participants during approximately 20 meetings over a six-month period.
