

BICKEY RIMAL

Assistant Vice President

Expert in Utility Regulation, Financial Advisory, Market Analysis & Resource Planning

Mr. Rimal has over eight years of progressive experience in the energy and environmental sector. He joined Concentric in 2011 after completing his Masters in International Public Affairs with a focus on Energy Policy from the University of Wisconsin at Madison, and has since contributed to projects involving cost of service, rate design, expert testimony preparation, energy market assessments, valuations of energy assets, and utility performance benchmarking. His work often involves financial modeling, statistical and econometrics analysis, and regulatory research. His modeling involves statistical software SPSS and R, and programming using Visual Basic for Applications (VBA).

Mr. Rimal has been involved in projects dealing with all aspects of the regulatory ratemaking process. He has extensively used Concentric's Excel-based, macro-driven Allocated Class Cost-of-Service (ACCOS) model for various clients, and has modified and updated the model as needed to suit the specific needs of clients.

Prior to enrolling in the graduate program, Mr. Rimal worked at ICF International. At ICF, he was extensively involved in projects dealing with policy design and implementation, cost-benefit analysis, economic impact analysis, regulatory evaluation, and environmental risk assessment.
