

# BRIANA ADAMS

## Project Manager

### Expert in Utility Regulation, Market Analysis & Resource Planning, Financial Advisory

---

Ms. Adams analyzes energy asset value issues, municipalization trends, mergers and acquisitions in the energy space, utility of the future initiatives, fuel economics, gas-electric co-optimization, and infrastructure issues. Her recent work efforts have focused on the valuation of utility energy assets, cost of equity regulation, and the development of distribution implementation plans for renewable integration and advanced technologies into utility operations. Recently, Ms. Adams was a lead analyst on a project supporting a subsidiary of an electric distribution utility in the development of their 2018 Distribution System Implementation Plan (DSIP), replacing the 2016 DSIP. This plan is a comprehensive five-year plan that presents investments, innovation activities, and changes in utility planning and operations that are designed to deliver value to customers, enhance grid performance, and contribute to a cleaner environment.

Before joining Concentric, Ms. Adams held consulting positions at ICF International, with a focus on natural gas energy economics issues, focusing on pipeline infrastructure, shale gas development, economic analysis of LNG exports, and North American gas supply access issues. Ms. Adams has over seven years of international work experience, with emphasis on China and the Middle East. She holds a master's degree in International Affairs, with a concentration in Energy Economics, from Columbia University, and a bachelor's degree in Economics, International Management, and Spanish from Hamline University.
