

RILEY BURNS

Senior Consultant

T: 508.263.6216 | E: rburns@ceadvisors.com

Riley Burns has developed and supported several regulatory analyses covering natural gas and electric demand forecasting, long-term decarbonization efforts, marginal cost studies, rate design, rate comparisons, and return on equity.

Ms. Burns has provided analytical and research support for natural gas portfolio optimization, strategic planning for natural gas pipelines, planning standards analysis, and long-term pipeline contract analysis.

She has also provided analytical and research support regarding the future energy transition, including topics such as hydrogen, renewable natural gas, and carbon capture.

Prior to joining Concentric Energy Advisors in July 2022, Ms. Burns graduated from Bates College with a Bachelor of Science degree. Her educational background in mathematics and digital and computational studies, combined with her past work experience in client-facing positions, contributes to her professional skillset and analytical capabilities.

Education

B.S., Bates College

Areas of Expertise

Electric & Gas Planning

Energy Transition

Marginal Cost Studies

Oil & Gas Pipelines

Rate Design, Cost Allocation
